

IT Technology Summary Directions

The summary provided includes a list of annual statement line items and functions that are representative of key activities.

Please list the annual statement balance and computer application(s) which generate the report(s) or maintain(s) that particular data. Identify the portion of the balance which is supported by the application listed, the computer report(s) which support the balance and provide a list of data files used by the application to generate the balance.

The summary also includes key activities which are not directly reflected in annual statement balances, i.e. underwriting, cash receipts, cash disbursements, and actuarial. Please list the applications used to perform these functions and key reports generated.
